Introduction

NAVIGATION SYSTEM OWNER'S MANUAL

This manual explains the operation of the Navigation System. Please read this manual carefully to ensure proper use.

The screen shots in this document and the actual screens of the navigation system differ depending on whether the functions and/or a contract existed and the map data were available at the time of producing this document.

Please be aware that the content of this manual may be different from the navigation system in some cases, such as when the system's software is updated.

Certain features described in this manual require the use of map PZ41C-EU330-01 (Q1 2015 data) or later.

Safety Instruction

HOW TO PROPERLY USE THE NAVIGATION SYSTEM

CAUTIONS

Exercise extreme caution if operating the navigation system while driving. Insufficient attention to the road, traffic or weather conditions may cause an accident.

While driving, be sure to obey the traffic regulations and maintain awareness of the road conditions. If a traffic sign on the road has been changed, route guidance may

To use this system in the safest possible manner, follow all the safety tips shown below. This system is intended to assist in reaching the destination and, if used properly, can do so. The driver is solely responsible for the safe operation of your vehicle and the safety of your passengers.

Do not use any feature of this system to the extent it becomes a distraction and prevents safe driving. The first priority while driving should always be the safe operation of the vehicle. While driving, be sure to observe all traffic regulations. Prior to the actual use of this system, learn how to use it and become thoroughly familiar with it. Read the entire Navigation System Owner's Manual to make sure you understand the system. Do not allow other people to use this system until they have read and understood the instructions in this manual.

For your safety, some functions may become inoperable when driving. Unavailable screen buttons are dimmed. While driving, listen to the voice instructions as much as possible and glance at the screen briefly and only when it is safe. However, do not totally rely on voice guidance.

Use it just for reference. If the system cannot determine the current position correctly, there is a possibility of incorrect, late, or non-voice guidance.

The data in the system may occasionally be incomplete. Road conditions, including driving restrictions (no left turns, street closures, etc.) frequently change. Therefore, before following any instructions from the system, look to see whether the instruction can be followed safely and legally. This system cannot warn about such things as the safety of an area, condition of streets, and availability of emergency services. If unsure about the safety of an area, do not drive into it.

Under no circumstances is this system a substitute for the driver's personal judgement.

Use this system only in locations where it is legal to do so.

Warnings

LIMITATIONS OF THE NAVIGATION SYSTEM

This navigation system calculates the current vehicle position using satellite signals, various vehicle signals, map data, etc.

However, the accurate position may not be shown depending on the satellite condition, road configuration, vehicle condition or other circumstances.

The GPS status icon appears on the right corner of the map when the screen is active.

The GPS signal may be physically obstructed, leading to inaccurate vehicle position on the map display. Tunnels, tall buildings, trucks, or even the placement of objects on the instrument panel may obstruct the GPS signals.

The GPS satellites may not send signals due to repairs or improvements being made to them.

Even when the navigation system is receiving clear GPS signals, the vehicle position may not be shown accurately or inappropriate route guidance may occur in some cases.

Icon	Meaning
	Good signal
	Average signal
	Bad signal
	No signal
	Dead reckoning

NOTICE

Once turned on, the system requires some time to find satellite signals and navigation data so it can calculate a solution for the position of your vehicle.

PRELIMINARY STEPS TO USE THE NAVIGATION SYSTEM

The navigation system is designed to operate extracting navigation data from the supplied micro SD. To properly operate the system do not remove the micro SD from its position.

To power ON the navigation system, close the sliding door on its front side. Once the door is properly closed, the LED will light up.

1 QUICK GUIDE

1.1	Navigation menu screen	8
1.1.1	Opening the navigation menu	8
1.1.2	Navigation menu functions	9
1.2	Map layout overview	10
1.2.1	Accessing the map page	10
1.2.2	How to explore the map	11
1.3	Setting the first destination	12
1.3.1	The Drive to menu	12
1.3.2	How to enter an address and start navigation	13
1.4	Map layout during navigation	14

Quick Guide

1.1 NAVIGATION MENU SCREEN

1.1.1 OPENING THE NAVIGATION MENU

Press the “Connection” button on the menu, then choose “NAVI” among the options in the list. If it is the first use, the NAVI software will ask to select the language. The Navigation System Disclaimer will be displayed in the selected language: read and accept it to continue.

1.1.2 NAVIGATION MENU FUNCTIONS

N	Function
1	MAP Direct access to the map page
2	DRIVE ME HOME Create a route to a user point saved as HOME
3	USER SETTINGS Preferences about the system: language, units, etc.
4	TRIP OVERVIEW A synoptic view of your trip
5	MAP SETTINGS Preferences about the routing and the map appearance
6	DRIVE TO Search and set a destination

1.2 MAP LAYOUT OVERVIEW

1.2.1 ACCESSING THE MAP PAGE

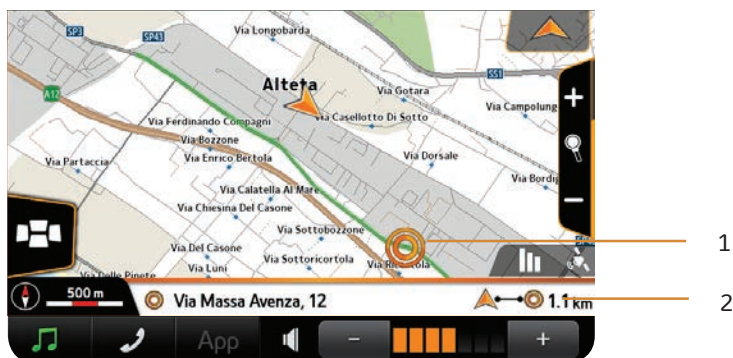

Access the map pressing the “Map” button in the Navigation Menu and tap a point on the map to activate the screen.

N	Function
1	NAVIGATION MENU Direct access to the Navigation Menu
2	COMPASS AND SCALE Orientation and scale of the map. Press it to change the map orientation, cycling between three modes: 2D north up, 2D head up, 3D.
3	ZOOM IN Press to zoom in
4	ZOOM OUT Press to zoom out
5	GPS STATUS ICON Indicator about the GPS signal quality
6	BOTTOM BAR It displays info about your current position

1.2.2 HOW TO EXPLORE THE MAP

The touch screen technology allows you exploring the map by acting on the display.

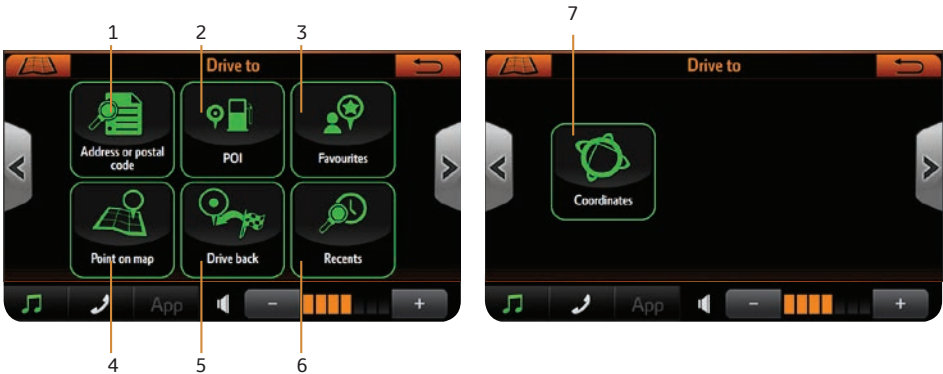

MAP - Active mode

Gesture		Effect
FIRST FINGER TAP		Activates the screen. In this mode, the controls and info on map become available.
Tap a point on the map		
SECOND FINGER TAP	1	Places the cursor.
Tap a point on the map	2	Info on the point appears in the bottom bar: name of the street and aerial distance from current position.
FINGER DRAG		Moves the map according the finger's movement direction.
Point the finger on the map and drag it in any direction		
PRESS THE BOTTOM BAR		Opens the info page on point.
PRESS ZOOM IN AND ZOOM OUT BUTTONS		Zooms the map
PRESS THE GPS STATUS ICON		Opens the GPS Page
PRESS THE MENU BUTTON		Goes back to Navigation menu

1.3 SETTING THE FIRST DESTINATION

1.3.1 THE DRIVE TO MENU

In the Navigation Menu, press the “Drive to” Button.

N	Function	Page
1	Address or postal code	13
	Search the destination point entering an address or a ZIP code.	
2	POI	21
	Search the destination in the preloaded database of points of interest.	
3	Favourites	22
	Search the destination among the favourite marks.	
4	Point on Map	24
	Search the destination exploring the map.	
5	Drive back	24
	Start a route to drive back to the departure point.	
6	Recents	24
	Search a destination between the last entries.	
7	Coordinates	24
	Set the destination by entering the lat-lon coordinates.	

1.3.2 HOW TO ENTER AN ADDRESS AND START NAVIGATION

In the Navigation Menu, press the “Drive to” Button.

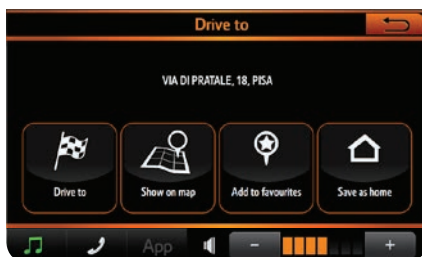

Drive to menu

Enter Address dialog

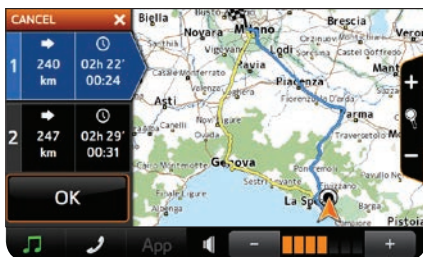

Keyboard

Start navigation menu

1. Press the “Address or postal code” button.
 2. Press “Country” to enter the desired country.
 3. Enter a digit: the software will display a list of countries starting with the selected letter.
 4. Select your choice by pressing one of the names in the list.
 5. Press town to enter the desired town. Start to digit: the software will propose a list of possible results.
 6. Select your choice by pressing one of the names in the list.
 7. Repeat the same for street and house number, then press OK.
 - 8 In the Start navigation menu, select “Drive to”.
 9. Choose your favourite route from the multiple route dialog and press OK.
- The route will be calculated.

Navigation System

2.1 SETTINGS

2.1.1 USER SETTINGS MENU

In the Navigation Menu, press the “User settings” button.

N	Setup	Description
1	LANGUAGE	It is possible to change the language of the software anytime from this setup. It affects both, texts and vocal instructions.
	List of languages	
2	TIME ZONE	The date and the time are automatically taken, in UTC format, from the GPS data. Select your time zone to adjust the UTC time.
	List of time zones	
3	VOLUME	Level control for vocal instructions volume, with “Test” and “Mute” button.
	Volume slider	
4	UNITS	Switch from metric to imperial for Distance, Speed and Altitude.
	List of presetted options	
5	DATE AND TIME PRESENTATION	Date formats: dd/mm/yyyy or mm/dd/yyyy Time formats: 12 am /12 pm or 24h
	List of available formats	
6	ABOUT	Navigation system info: software and map version.
	Info page	
7	CLEAR RECENTS	Clear all the recently searched destinations.
8	FACTORY RESET	Set back the navigation system to the factory defaults setting.

2.1.2 MAP SETTINGS MENU

In the Navigation Menu, press the “Map settings” button.

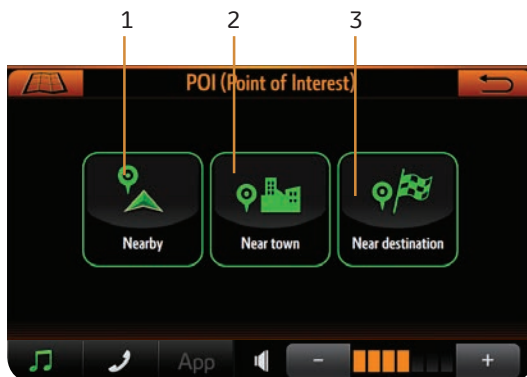

N	Setup	Description
1	ROUTE SETTINGS	It allows to enable alternative routing and junction view. It also allows to customize the route calculations, avoiding special type of roads, such as toll roads.
2	MAP VIEW	View options: 2D north up, 2D head up or 3D.
3	ICONS ON MAP	Hide or show POI icons on map.
4	PALETTE	Map palette options: day light or night view.
5	AUTOZOOM	Enable or disable autozoom option.
6	SPEED CAMERA	Enable or disable speed camera alarm and speed camera icons on map.

2.2 DRIVE TO MENU

2.2.1 Searching a POI

In the Navigation Menu, press the “Drive to” button, then press “POI button”.

POI menu

N	Function	Description
1	NEARBY	Allows to select a POI close to your position. Available only with GPS position.
2	NEAR TOWN	Allows to select country and town name with the virtual keyboard.
3	NEAR DESTINATION	Allows to select a POI close to the set destination. Available only with an active route.

To change the research range:

1. Choose the search option, for instance “Nearby”.
2. In the categories list, on the right side press “Change range”.
3. Move the control to set the range and then press “Back” button to go back to the categories list.
4. Continue by choosing the subcategory or by pressing the “Search by name” button.

To search by name:

1. Choose the search option, for instance “Nearby”.
2. In the categories list, on the right side press button “Search by name”.
3. Enter name in with the virtual keyboard and press OK.
4. Choose the POI in the results list.

Categories list

2.2.2 Favourites list

In the Drive to menu, press the “Favourites” button. At the first use, the list appears empty.

Favourites list

To add a favourite:

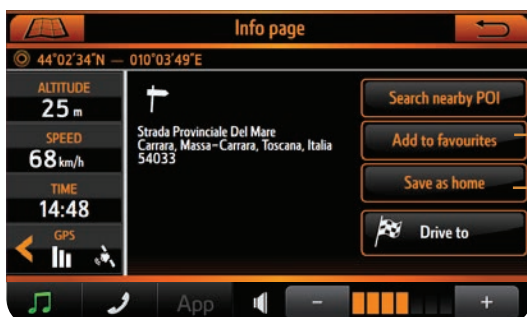

1. On map, when in cursor mode press the bottom bar.
2. In the full info page, press “Add as favourite” button.

or

1. Search a point by entering an address or using “POI”, “Coordinates”, “Recents” options in the Drive to menu.
2. At the end of the process, in the Start Navigation pop up menu, press the “Save as favourite” button.

To set a favourite mark as destination:

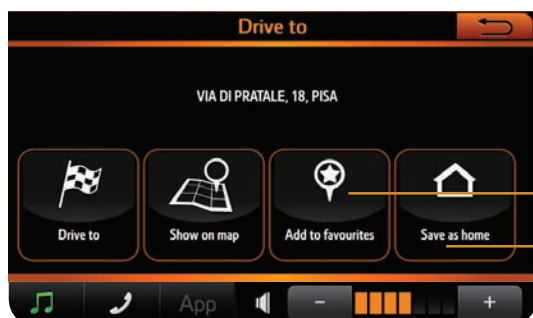

1. In the favourites list, scroll the list and tap on the chosen mark.
2. In the Start Navigation pop up menu, press the “Drive to” button.

Full info page

Add to favourites button

Save as home button

Start Navigation pop up menu

Add to favourites button

Save as home button

2.2.3 Home mark

Home is a special type of favourite mark. Saving a point as Home, you will have quick access to start the navigation to it, directly from the Navigation menu.

Save Home mark from the navigation menu:

In the Navigation menu, press the “Drive me home” button. If home has not been previously set, the software will ask the user to set it, using the same options present in the Drive to menu.

Save Home mark from map or drive to menu:

1. On map, when in cursor mode press the bottom bar.
2. In the full info page, press the “Save as home” button.

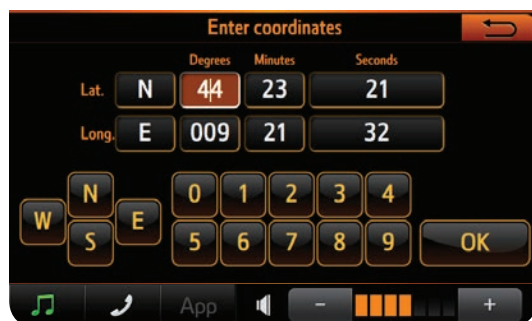

or

1. Search a point by entering an address or using the “POI”, “Coordinates”, “Recents” options in Drive to menu.
2. At the end of the process, in the Drive to pop up menu, press “Save as home” button.

To set Home as destination:

1. In the Navigation menu, press the “Drive me home” button.

2.2.4 Other Drive to options

Enter coordinates page

Recents list

Drive to button

Map: picking a destination

COORDINATES

To set a destination with lat-lon coordinates:

1. In the Drive to menu press the “Coordinates” button.
2. Tap on each field to edit it, entering values on the virtual keyboard.
3. Press OK.

RECENTS

To find a recent destination:

1. In the Drive to menu press the “Recents” button.
2. Scroll the list with the arrows and tap the desired item.

DRIVE BACK

This function allows to calculate the route to the last starting point. Just press on it to start the calculation.

POINT ON MAP

This function allows to explore the map and pick a point to set as destination.

To pick a point and set destination:

1. In the Drive to menu press the “Point on map” button.
2. Explore the map dragging it with a finger.
3. Tap on the desired point to place the cursor.
4. Press the “Drive to” button on the left side of the map.

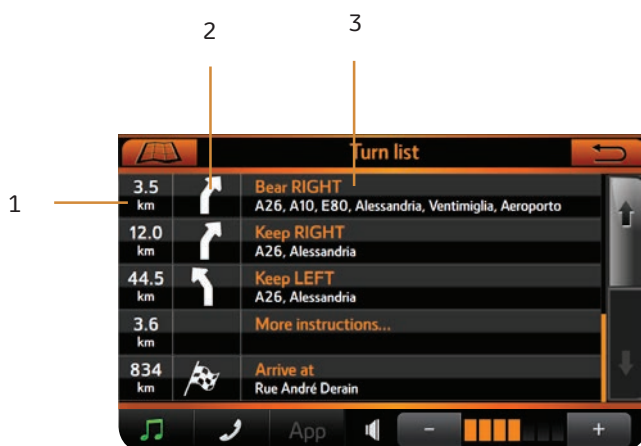

2.3 TURN LIST

2.3.1 The turn list

To open the turn list, press the turn indicator on map.

Turn indicator

Turn List

N	Item	Description
1	TURN DISTANCE	Indicates the distance from the current position.
2	TURN PICTOGRAM	It indicates the type of turn, including roundabouts and highways exits.
3	DESCRIPTION	Maneuver description and street name.

2.3.2 How to avoid a manoeuvre

To avoid a manoeuvre :

1. In the list, tap on the manoeuvre.
2. In the pop up menu, press the “Avoid” button.

Once a maneuver is avoided, a route recalculation occurs. Any following route recalculation will take into account the previously avoided maneuver. Only in case the route is deleted or a new destination is set, the previously avoided maneuver will be taken again into account for route creation.

2.4 TRIP OVERVIEW

On the map, tap a point to activate the screen and then press the “Trip overview” button. This page is available also from the Navigation menu.

N	Item	Additional info
1	DEPARTURE	The icon represents the departure point.
2	CURRENT POSITION DATA	The box displays the distance and the time to go data.
3	ARRIVAL	The icon represents the destination point.
4	ARRIVAL DATA	The box displays the total distance and the total time data.
5	DEPARTURE TIME	The data box displays the time at the departure point.
6	DISTANCE FROM DEPARTURE	The data box displays the distance covered from the departure.
7	ESTIMATED TIME OF ARRIVAL	The data box displays the time of arrival. The estimation is based on speed limits data.

2.5 GPS PAGE

On the map, tap a point to activate the screen and then tap the GPS status box. The GPS page is available also from Trip overview page and Full info page.

N	Item	Additional info
1	COMPASS	Available only with fix position.
2	DIRECTION	Available only with fix position.
3	SKY	The representation of the sky is north up oriented, as the compass.
4	SATELLITE ICONS	Yellow: low signal. Green: strong signal.
5	SATELLITE SIGNAL LEVELS	Yellow: low signal. Green: strong signal.

DECLARATION OF CONFORMITY

We,

AvMap S.r.l. Viale Zaccagna 6, 54033 Carrara - Massa Carrara ITALY

declare under our sole responsibility that the following product:

Product Name: **X-Nav**

Model n.: **PZ41C-90330-00**

Type of Equipment: **Navigational Instrument with accessories**

to which this declaration relates is in conformity with the following standards:

Test	Standard
Conducted emissions Radiated emissions	EN 301 489-1 V1.9.2 EN 301 489-19 V1.2.1
Conducted radiofrequency interferences Conducted RF immunity Electrostatic discharge ESD Radiated interferences Radiated RF immunity	EN 301 489-1 V1.9.2 EN 301 489-19 V1.2.1
Radio Requirements	EN 300 440-1 V1.6.1 EN 300 440-2 V1.4.1
Immunity against disturbances conducted on supply lines	ISO 7637-2, §6.8 Annex 1 Directive 72/245/CEE
Safety	EN 60950-1:2006 +A11+A1+A12

so, the product complies with the essential requirements of the 99/05/EEC (R&TTE) directive

Place of issue: **Carrara**

Date of issue: **May 05th 2014**
